

Infosafe No™ VAR7H Issue Date : June 2016 ISSUED by HUNTERST

Product Name **CHLORBRITE**

1. Identification

GHS Product Identifier CHLORBRITE

Company Name Hunters Products (TAS) Pty. Ltd. (ABN 004 601 263)

Address 60 Gleadow Street INVERMAY
TAS 7248 Australia

Telephone/Fax Number Tel: 03 6331 4755
Fax: 03 6334 1065

Emergency phone number 0407 610 542

Recommended use of the chemical and restrictions on use As a bleach.
Use as directed on the product label.

2. Hazard Identification

GHS classification of the substance/mixture Acute Toxicity - Oral: Category 4
Eye Damage/Irritation: Category 2A
Hazardous to the Aquatic Environment - Acute Hazard: Category 1
Hazardous to the Aquatic Environment - Long-Term Hazard: Category 1
STOT Single Exposure: Category 3 (respiratory tract irritation)

Signal Word (s) WARNING

Hazard Statement (s) AUH031 Contact with acids liberates toxic gas.
H302 Harmful if swallowed.
H319 Causes serious eye irritation.
H335 May cause respiratory irritation.
H410 Very toxic to aquatic life with long lasting effects.

Precautionary statement - General P102 Keep out of reach of children.
P103 Read label before use.

Pictogram (s) Exclamation mark, Environment

Precautionary statement - Prevention P261 Avoid breathing dust/fume/gas/mist/vapours/spray.
P264 Wash contaminated skin thoroughly after handling
P270 Do not eat, drink or smoke when using this product.
P273 Avoid release to the environment.
P280 Wear protective gloves/protective clothing/eye protection/face protection.

Precautionary statement - Response P301+P312 IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell.
P304+P340 IF INHALED: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
P312 Call a POISON CENTER or doctor/physician if you feel unwell.
P337+P313 If eye irritation persists: Get medical advice/attention.
P391 Collect spillage.

Precautionary statement - Storage P403+P233 Store in a well-ventilated place. Keep container tightly closed.

Precautionary statement - Disposal P501 Dispose of contents/container in accordance with local regulations.

3. Composition/information on ingredients

<u>Ingredients</u>	<u>Name</u>	<u>CAS</u>	<u>Proportion</u>
--------------------	-------------	------------	-------------------

Infosafe No™ VAR7H	Issue Date : June 2016	ISSUED by HUNTERST
--------------------	------------------------	--------------------

Product Name **CHLORBRITE**

Ingredients	Name	CAS	Proportion
	Sodium dichloroisocyanurate, dihydrate	51580-86-0	10-30 %
	Ingredients determined not to be hazardous		to 100%

4. First-aid measures

Inhalation	Remove from exposure, rest and keep warm. Apply artificial respiration if not breathing. Unless exposure has been slight, obtain medical attention.
Ingestion	If swallowed, do NOT induce vomiting. Give a glass of water to be taken slowly.
Skin	If skin contact occurs, remove contaminated clothing and wash skin thoroughly. Wash clothing before re-use.
Eye contact	If in eyes, hold eyes open, flood with water for at least 15 minutes and see a doctor.
First Aid Facilities	Eye wash. Hand wash basin.
Advice to Doctor	Product is an alkaline mixture containing a moderate proportion of a chlorinating agent, with nearly 15 % available chlorine. Irritating to skin and eyes. If swallowed, possible risk of mucosal damage. Inhalation exposure may lead to delayed onset pulmonary oedema. Contact Poisons Information Centre.

5. Fire-fighting measures

Suitable extinguishing media	Water fog or fine water spray.
Hazards from Combustion Products	Water vapour, chlorine, hydrogen chloride, oxides of nitrogen, hydrogen cyanide.
Specific Methods	In case of small fire/explosion use water. In case of major emergency use PPE: breathing apparatus and protective gloves.
Specific hazards arising from the chemical	Not flammable. Mixtures with combustible materials may be readily ignited and can burn fiercely, especially in the presence of moisture. Contact with acids will generate carbon dioxide, a simple asphyxiant, and chlorine, a toxic gas. May react violently with calcium hypochlorite.

6. Accidental release measures

Spills & Disposal	Disposal of small spillages only. For large spillages liquids should be contained using sand or earth, and both liquids and solids then transferred to salvage containers. Residues should be treated as for small spillages. CAUTION: Before dealing with spillage take necessary protective measures, inform others to keep at a safe distance and, for flammable materials, shut off all possible sources of ignition. If local regulations permit, mop up with plenty of water and run to waste, diluting greatly with running water. Otherwise transfer to container and arrange removal by disposals company. Wash site of spillage thoroughly with water. Ventilate area to dispel any residual vapour.
------------------------------	--

7. Handling and storage

Conditions for safe storage, including any incompatibilities	Store in a cool, dry, well ventilated area, out of reach of children. Large quantities should be stored in a dangerous goods store. Store in original container. Keep container tightly closed. Keep container dry. Keep away from calcium hypochlorite, combustible materials, acids, copper and copper alloys. Protect from physical damage. Clean up all spills promptly; avoid secondary accidents.
Additional information on precautions for use	Incompatible with: Acids, other types of chlorinating agents, oxidising agents.

8. Exposure controls/personal protection

Infosafe No™ VAR7H Issue Date : June 2016 ISSUED by HUNTERST

Product Name **CHLORBRITE**

Appropriate engineering controls Do not use copper or copper alloys as materials of construction. Use in a well ventilated area. Consider local mechanical exhaust/extraction to keep airborne contamination below TLV.

Personal Protective Equipment Avoid contact with the skin. Prevent contact with the eyes. Avoid breathing the dust. Personal protection to be selected from those recommended below, as appropriate to mode of use, quantity handled and degree of hazard:-
Dust mask
Face shield or safety glasses
Gloves, rubber or plastic
Plastic apron, sleeves and boots
Impervious overalls. CAUTION: Cotton or linen overalls impregnated with oxidisers may be readily ignited and can burn fiercely.
Always maintain a high level of personal hygiene when using cleaning chemicals. That is wash hands before eating, drinking, smoking or using the toilet.

9. Physical and chemical properties

Form Solid

Appearance White, granular powder.

Odour Slight smell of chlorine.

Melting Point No data.

Solubility in Water Soluble

pH Neutral to slightly alkaline.

Vapour Pressure None

Volatile Component About 8 % as available chlorine.

Flash Point None.

Flammability Not flammable. Mixtures with combustible materials may be readily ignited and can burn fiercely, especially in the presence of moisture.

Auto-Ignition Temperature No data for the mixture. Sodium dichloroisocyanurate will undergo self-sustaining decomposition with evolution of heat if heated to 240 - 250 °C.

Other Information Alkaline mixture. Will react vigorously with acids, generating chlorine, a toxic gas, and carbon dioxide, a simple asphyxiant. May react with oxidising agents, reducing agents, and other types of chlorinating agents. May react violently with calcium hypochlorite. Slightly hygroscopic, may absorb moisture from the air. Will decompose slowly on contact with moisture. Dissolves in water to form a mixture, including sodium cyanurate, sodium hypochlorite and free chlorine. Heating above 240 °C may cause a self-sustaining auto-decomposition, generating toxic fumes. Incompatible with ammonium salts and nitrogenous compounds, combustible materials.

10. Stability and reactivity

Chemical Stability Stable under normal use conditons.

Conditions to Avoid Incompatible materials, moisture, heat.

Incompatible Materials Acids, oxidising agents, reducing agents, other types of chlorinating agents, ammonium compounds.

Hazardous Decomposition Products Oxides of nitrogen, chlorine, hydrogen cyanide.

Possibility of hazardous reactions Reacts vigorously with acids, generating carbon dioxide and chlorine. May react violently with calcium hypochlorite, and other types of chlorinating agents. May react with combustible materials, especially in the presence of moisture.

11. Toxicological Information

Infosafe No™ VAR7H	Issue Date : June 2016	ISSUED by HUNTERST
--------------------	------------------------	--------------------

Product Name **CHLORBRITE**

Acute Toxicity - Oral	LD 50 : Sodium dichloroisocyanurate 700 mg/kg oral, rat 6,000 mg/kg skin rabbit
	LC 50 : Chlorine 293 ppm/1 hour, rat
	LCLo : Chlorine 2,530 mg/m3/30 min, human
Ingestion	Harmful if swallowed. Likely to cause gastric upset, a burning sensation, nausea, vomiting and diarrhoea. May cause electrolyte disturbances if swallowed. May cause ulceration and bleeding from the digestive tract. Other effects may include lachrymation, difficulty breathing, sore throat.
Inhalation	Dust will irritate the respiratory system. Risk of tissue damage. Chlorine gas will irritate the respiratory system at levels of 1 ppm. At 1.3 ppm of chlorine there may be coughing and difficulty breathing. Higher levels may cause throat muscle spasms and suffocation. May cause pulmonary oedema (fluid in the lungs) some time after exposure.
Skin	Mildly corrosive. May cause burns when moist.
Eye	Corrosive. Risk of permanent eye damage.
Chronic Effects	Repeated low-level contact with chlorine may cause erosion of the teeth and chloracne.

12. Ecological information

Ecotoxicity	Very toxic to aquatic organisms. May cause long term adverse effects in the aquatic environment.
Mobility	Readily transported by water.
Environmental Protection	Avoid contaminating waterways, drains, sewers, or ground.

13. Disposal considerations

Waste Disposal	Land fill, sewer (small quantities). Refer to Land Waste Management Authority in your State. Note: Contains a high proportion of inorganic sulphate. The disposal of large quantities of sulphates to concrete sewer may be regulated by local authorities.
Special precautions for landfill or incineration	Unsuitable for incineration.

14. Transport information

Transport Information	Not classified as a Dangerous Good according to the Australian Code for the Transport of Dangerous Goods by Road and Rail.
------------------------------	--

15. Regulatory information

Poisons Schedule	S5
Hazard Category	Irritant, Dangerous for the environment
AICS (Australia)	All components listed.

16. Other Information

Signature of Preparer/Data Service	Technical Manager 0407 610 542
Technical Contact Numbers	Emergency Advice All Hours: Technical Manager: 0407 610 542 Mon-Fri 8am - 6pm Poisons Information Centre: 13 11 26 - 24hrs Transport/Fire Emergency: 000 (Emergency services)
Other Information	This SDS summarises at the date of issue our best knowledge of the health and safety hazard information of the product, and in particular how to safely handle and use the product in the Workplace. Please refer to the technical datasheet (Instructions for use), and the label on the drum. The company cannot anticipate or control the individual working conditions encountered and so each user should read this SDS carefully, and if in
